

The effect of legislation to ban smoking and its effects on the cardiovascular health of nonsmoking adults, however, remains a question. However, the authors note that the evidence for determining the magnitude of the relationship between chronic secondhand smoke exposure and coronary heart disease is not very strong. Secondhand Smoke Exposure and Cardiovascular Effects: Making Sense of the Evidence. Institute of Medicine (US) Committee on Secondhand Smoke Exposure and Acute Coronary Events. Data suggest that exposure to secondhand smoke can result in heart disease in nonsmoking adults.
