India

Abstract

In India in recent years there has been an increase in the number of malpractice suits that have arisen because of lack of consent or inadequate consent from the patients for various procedures. Many clinicians are unaware of the legal and ethical requirements and clinical aspects of consent in Medicine in India. Unlike many other countries, the Indian Statute Book does not contain separate legislation regarding age for consent to medical treatment. This paper discusses the ethical, legal and clinical aspects of informed consent. For effective legal protection, suggestions have been given for taking proper informed consent in various scenarios. There is a need to frame guidelines for
